Ferry Lane South Waste Transfer Facility

Permit Number BP3934MQ

Introductory note

This introductory note does not form a part of the permit

The main features of the installation are as follows.

Adler and Allan Limited own and operate the installation. The site is a Transfer Station accepting oil and oil contaminated wastes, along with hazardous wastes. The site previously operated solely under waste management licence WML80669; issued on 17/11/04. The site is located within the Ferry Lane South Industrial Estate, Rainham, Essex, at grid reference TQ 50120 81450. The surrounding area is largely industrial land; Rainham Creek runs along the western boundary; further south lies the R. Thames; and just beyond the eastern boundary the edge of the Rainham Marshes SSSI begins.

There should be no effect on the SSSI from this installation as there are no point source emissions to air or controlled waters. The Operator is aware of the potential for fugitive emissions to be emitted from the installation.

The site is primarily involved with the collection, storage and onward transfer of waste oils. However waste acids, alkalis, solvents, lab smalls, and similar hazardous waste are also accepted. The PPC permit application is being made because the site accepts more than 10 tonnes of oil/oil contaminated wastes. The storage of non-oily hazardous wastes has been increased to bring it under the PPC regime as a separate activity.

The processes undertaken on site include: storing waste oils and a wide range of hazardous wastes (in IBCs, drums and bulk storage tanks etc); simple bulking activities; repackaging waste lab smalls. On issue of the permit, the WML will partially remain in force, as there are activities involving hazardous waste handling for recycling undertaken.

The Operator is proposing to start gravity settlement of the waste oil, there is no infrastructure as yet. Although permitted to undertake this activity, pre-operational conditions have been included to ensure that when the activity is brought on-line the design, construction and operation of the plant is in accordance with and in agreement with the Agency.

Non-listed activities are also undertaken on-site which are directly associated to the listed activities. These are the re-packaging of non-hazardous waste lab smalls and discharge to sewer. The current discharge, controlled by Thames Water, is of un-contaminated surface run-off, but once the gravity settlement is being undertaken, the Operator is proposing to discharge the settled water down the sewer.

At the time of the application the Operator was applying for the international standard ISO14001.

Schedule 6 - Notification

These pages outline the information that the operator must provide.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the PPC Regulations.

Schedule 7 - Interpretation

"*accident*" means an accident that may result in pollution.

"*accident management plan*" means a documented procedure (or procedures) that set out the measures necessary to prevent accidents occurring within the permitted installation, during both normal and abnormal operations, and limit the consequences to human health or the environment of any such accidents that do occur.

"*annually*" means once every year.

"*application*" means the application for this permit, together with any additional information supplied by the operator as part of the application and any response to a notice served under Schedule 4 to the PPC Regulations.

"*disposal*" shall mean any of the operations provided for in Annex IIA to Directive 75/442/EEC.

"*emissions to land*", includes emissions to groundwater.

"*fugitive emission*" means an emission to air, water or land from the activities which is not controlled by an emission limit.

"*groundwater*" means all water, which is below the surface of the ground in the saturation zone and in direct contact with the ground or subsoil.

"*land protection guidance*", means Agency guidance "H7 - Guidance on the protection of land under the PPC Regime: application site report and site protection monitoring programme".

"*MCERTS*" means the Environment Agency's Monitoring Certification Scheme.

"*notify/notified without delay*" means that a telephone call can be used, whereas all other reports and notifications must be supplied in writing, either electronically or on paper.

"*PPC Regulations*" means the Pollution, Prevention and Control (England and Wales) Regulations SI 2000 No.1973 and words and expressions used in this permit which are also used in the Regulations have the same meanings as in those Regulations.

Unless otherwise stated, any references in this permit to concentrations of substances in emissions into air means:

- (a) in relation to emissions from combustion processes, the concentration in dry air at a temperature of 273K, at a pressure of 101.3 kPa and with an oxygen content of 3% dry for liquid and gaseous fuels, 6% dry for solid fuels; and/or
- (b) in relation to emissions from non-combustion sources, the concentration at a temperature of 273K and at a pressure of 101.3 kPa, with no correction for water vapour content
